

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph at Page 8 beginning at line 20 with the following amended paragraph:

--The ammonium glyphosate salt obtained according to the process of the present invention can be directly used for preparing the solid formulation of ammonium glyphosate salt because of lower water content, and also can be dried in various manners such as pneumatic drying or oven-drying and the like without any agglomerate. The water content or organic solvent content in the ammonium glyphosate salt can be reduced to ~~0.1-0.2%~~ 0.1-2% by oven drying.--
